Northrop Grumman Promotes Glenn Morgan to Director in Nuclear Engineering and Test Division

NEWPORT NEWS, Va. – November 13, 2006 – Northrop Grumman Corporation's (NYSE: NOC) Newport News sector has promoted Glenn Morgan to director of nuclear construction engineering, materials engineering and standardization. In his new position, he will be responsible for providing engineering, design, and material support for various aircraft carrier and submarine programs. He will also oversee the standardization of procedures within nuclear and test engineering. He reports to Rolf Bartschi, vice president and chief nuclear engineer of waterfront nuclear engineering and test at Northrop Grumman Newport News.

“Glenn brings a wealth of knowledge and experience to his new position,” said Bartschi. “I am confident his leadership will have a positive impact on our organization.”

Prior to this appointment Morgan served as manager of reactor services. He began working at Newport News in 1988 as a refueling engineer and has held a variety of positions of increasing responsibility including lead engineer, engineering supervisor and engineering manager.

Morgan earned a bachelor's degree in mechanical engineering from North Carolina State University. He currently resides in Virginia Beach, Va.

Northrop Grumman Corporation is a global defense company headquartered in Los Angeles, Calif. Northrop Grumman provides technologically advanced, innovative products, services and solutions in systems integration, defense electronics, information technology, advanced aircraft, shipbuilding and space technology. With more than 120,000 employees and operations in all 50 states and 29 countries, Northrop Grumman serves U.S. and international military, government and commercial customers.
